

ADDENDUM TO PACK-ALL WARRANTY

IMPORTANT – Please Read Before Using System

The seal system in this machine uses Pre-Made, Pre-Stretched, Quick-Change Seal Wires that are designed and built for the specific characteristics of the sealing system. Use of any seal wires other than those that have been manufactured by Pack-All for use in this machine **will nullify the warranty of this system.** These wires have been manufactured to specifications that maximize the efficiency of the entire seal system and **must** be used for the seal system to function properly. They are designed with terminal rings for quick, easy, **No Tools Required** replacement and use of any other wires can cause damage to the system as a result.

The seal head assembly is also designed and fabricated for use of these wires and use of any other wires can cause damage to the seal head assembly as well. If a wire breaks and you do not have a replacement wire, ***do not attempt to make and use wires from any other source such as a spool of wire.*** Installing wires made from a spool will require tools for installation and can cause component damage to the seal head assembly and could cause personal injury, voiding the warranty coverage on the system.

As part of your routine maintenance procedures, please assure that you keep at least one spare set of pre-made, quick-change seal wires on-hand for use as replacements when needed. These are standard parts which are stock items and can be ordered by contacting your local distributor or Pack-All at (708) 410-1140.

****Thank you for purchasing a Pack-All shrink system. We appreciate your business.****
